

INTEGRAL TECHNOLOGY CERTIFICATION ISO9001: 2015

Certification technology validated by international certification bodies (ABS, BVQI, TUV)

Advantage & Benefits?

- ✓ Provide evidence to achieve and maintain certification
- ✓ Provide customized measurement graphs and are updated in real time
- ✓ Reduction of man-hours in the management of graphs and statistics, the system updates in real time
- ✓ Data synchronized with Excel
- ✓ Access to customers in a controlled manner
- ✓ Standardization of formats and electronically signed
- ✓ Traceability of information in all modules
- ✓ Allows inserting files within the formats
- ✓ The modules are never obsolete, they are updated according to customer requirements and changes of new versions of the standard
- ✓ Daily, weekly or immediate notifications
- ✓ Formats can be in different languages
- ✓ Custom views, according to your needs
- ✓ Control of different access levels for each module
- ✓ Data shared to other modules, the information is not duplicated
- ✓ Drastic reduction of costs and man hours due to the handling of information electronically
- ✓ Quality management system depends on electronic systems and not only personnel
- ✓ 99.98% annual availability
- ✓ Our systems are customized according to the client
- ✓ The advice is highly dynamic using software for its documentation
- ✓ Audits are received almost without papers
- ✓ 24 Documentation modules

Available on cell phone to be used

Which Includes This Technology?

- Consulting
- Software Training (21 Modules)
- Internal Auditors Training
- Interpretation of ISO9001:2015 Code
- Software Customized to Customer Requirements

Integral and Continuous Advice

- Continuous support during and after certification
- Support in each maintenance audit
- Continuous training for new internal auditors
- Continuous advice on changes of the standard

System validated by international organizations
in certification audits
